NNCI Societal and Ethical Implications Webinar

Wednesday, May 7, 2025 | 4 - 5 p.m. ET

Behind the Curtain: What is happening in US Science & Technology Policy Today?

Over the last few months, the US federal science and technology policy landscape has been shifting rapidly. The ways in which science and engineering are being used to inform policy and the ways in which the federal government shapes, supports, and directs science and engineering don't look like they did just a few months ago. Join us for a webinar with Dr. Deborah Stine, who will share not only a lifetime of S&T Policy experience, but also her insights into the latest happenings in Washington, DC. The webinar will start with a discussion with Dr. Stine followed by a chance for questions from the audience.

Dr. Deborah Stine, Science & Technology Policy Academy

Dr. Deborah D. Stine is the Founder of the Science & Technology Policy Academy. Previously, she served in the Obama White House as Executive Director of the President's Council of Advisors on Science and Technology, a Science & Technology Specialist at the Congressional Research Service, a study director at the National Academies of Sciences, Engineering, and Medicine, and as a professor of the practice in engineering and public policy at Carnegie Mellon University. Her 2024 book, *From Expertise to Impact: A Practical Guide to Informing and Influencing Public Policy*, demystifies the policy analysis process to inform decision-making. She has a BS in engineering, an MBA, and a Ph.D. in policy analysis. More information is available at <https://scitechpolicyacademy.com/>.
